

Yale® Rapide locking system

The Yale Rapide is the window lock leading the way in security. It redefines expectations of performance and delivers additional benefits to installers and consumers, whilst still delivering the peace of mind expected from the world's favourite lock company.

At East Anglia Windows Manufacturing we use the Yale Rapide locking system for all of our windows, a lock we believe offers unrivalled protection against burglary and vandalism.

Delivering improved efficiencies in manufacturing and installing, as well as incredibly smooth operation and no loss of weather-proofing performance - ever, Yale Rapide is the lock that has reset the bar for window hardware performance.

The Rapide offers greater lock engagement for additional security as it connects along the full length of the keep. Plus, unlike other window locks, Yale Rapide's aluminium channel uses the full depth of the euro-groove to enhance the strength of the window.

Tested to BS EN Grade 5 (480 hours NSS) and endurance tested to 30,000 cycles, Yale Rapide comes with all the assurance you would expect. Exceeding PAS 24 requirements, the lock also comes with Secured by Design accreditation. Yale Rapide even comes with Yale's 12 year mechanical guarantee for complete peace of mind.

Ready to specify

- Yale Rapide has all the credentials you would need and want
- Available in an offset variant where lower placed handles are necessary, aiding compliance with the Lifetime Homes Design Guide

Simple to install

- A fully retracting blade delivers greater clearances
- The unique geometry and precision engineering eliminates cam clash issues
- The rotating action and keep engagement eliminates wear

Robust aluminium construction

- Outstanding anti-corrosion performance
- Suitable for aggressive environments
- Enhances service life expectancy
- Supported by 12 year mechanical guarantee
- Uses full eurogroove to enhance window system

Keeps

- Full lock engagement for optimum security
- No marking and less fixings required
- Adjustable keeps now available
- Reversible insert provides 1mm compression adjustment

Precision-engineered blade

- Rotating action dramatically reduces wear
- Eliminates loss of compression performance
- Lock engagement along with full length of the keep

Gearbox

- Unique 20mm or 22mm reversible gearbox
- Patented design allows for easy maintenance

Flexible

- Suitable for sash sizes from 220mm to 1629mm
- One Yale Rapide height suits all profile systems
- Offset variant for lower handle height requirements
